

## PREPARING PETS FOR TRAVEL TO AUSTRALIA

- ALL vet work needs to be done by an Official Vet (MOST practices in the UK have an OV)
- SAME minimum time frame for cats and dogs – all based around RABIES vacc and bloods
- WE will HELP you and YOUR nominated OV with vet plans and full guidance – draft vet plans and send template declarations
  - MOST of the time OUR OV will do the final vet check and issue the export vet certificate
- GET ready early – no one knows when you will get a visa / flight and things change so all you can do is get pets ready with minimum cost and commitment and then engage us to make the final plans when the time comes
  - Import permits take about 6-8 weeks to be granted
- WE NEED the import permit to book quarantine, flights and set a vet plan for you

### AS a minimum we need:

- Rabies and general vaccine certificate
- Rabies blood test report (RNAT) from approved lab (APHA/Biobest or IDEXX Germany most common)
  - Local vet (OV's) details to send vet plans
- Booking confirmation with UK and ideally AUS location – if you don't have an Aussie address/phone we can use any one of our AUSSIE office locations so no problem
  - Preferred date of travel
  - Local vets details to engage
